

**Cross-Resource Action Meeting – Flip Chart Notes
Oroville Facilities Relicensing (FERC Project No. 2100)**

Afterbay Management

- Wildlife management area
- wetland surrounding Afterbay = giant garter snake habitat designation
- vernal pool habitat – listed species
- OWA = Elderberry habitat

(Additional consultation would be required (for above))

- Margin – ggs habitat – 1:1 replacement
1/10 acre/year allowed take
- CVHJV – designated Afterbay as migratory species habitat constraints management
- Title 14 – regulates activities on OWA
< 5 mph boat speed

-
- Yellow = Cultural – later discussion
 - Pink = Environmental
 - Blue = Operational / Enviro. / Temp
 - Green = Operational impacts / Flow

- Come back to LF12

Afterbay

- Temp controls to reduce temps in river – modeling scenarios –
 - Increase flows in LFC
 - New structure to route water around Afterbay
- FWS – wants no increase recreation unless it is “wildlife-friendly”

Low-Flow Channel - EWG

- Focus area for ESA species (Spring-run Chinook and steelhead)
 - streamflow (↑↓)
 - temps (lower)
 - habitat (add)
 - side channel development for spawning and rearing
 - tied to ↑ flows (800 – 1,800 cfs)
- Spring run / Fall run genetic integrity
 - weirs to segregate fish to reduce competition
- Spawning gravel replenishment program
